How to Connect to ascc-wifi

1) On the options for wireless connections available, choose “ascc-wifi”

2) Open up a web browser. For this example, Internet Explorer is used. You should get the following page:

3) When you receive this message, click on “Continue to this website (not recommended)”. You should not do this for ALL sites, but for this particular warning, it is okay to move forward.

If you are using a different browser, you should see a message regarding a certificate warning, similar to the one shown here. When you receive these warnings, it is okay to bypass them and click accept even if it is not recommended. Again, these instructions are meant of ONLY the ascc-wireless connection page, you should use caution if you receive this message with other sites.
4) Once you click on “Continue to this website (not recommended)”, you should be directed to the ASCC WiFi login page. You should enter your ASCC username and password. This is the same login you use for your ASCC amsamoa.edu E-mail account.

5) After you enter your ASCC username and password, click Log In

6) If you’ve entered everything correctly, you will get the following confirmation:

7) After successfully logging in, click Continue and you will be directed to your Internet home page, and you may begin browsing.
